1 SDK Hardware

The SDK hardware contains two programming interfaces. These are identical to those of the CHIPLINE. Each is equipped with both, a contact and a contactless interface. The two programming interfaces are controlled by an embedded real time controller.

The transportable compact controller housing protects all relevant hardware parts and affords flexibility in use.

2 Script Creator

- Standard personalization application to process personalization scripts (XML/TEXT – based)
- AZ Script Creator to generate XML scripts for memory cards
- VxWorks™ run time license
- Documentation

3 Script Tester

- AZ Script Tester to test personalization scripts for memory cards and micro-processor cards
- VxWorks™ run time license
- Documentation

4 Application Development Software

- Integrated software library for call out of the personalization application, including flashing EMOSYN chips and RAW data transmission support for sending single bytes or blocks of bytes to a card
- Basic personalization application framework as source code (C++)
- VxWorks™ system integrator license from Wind River
- Tornado™ integrated development environment from Wind River for personalization application development
- Documentation
