About Atlantic Zeiser

Atlantic Zeiser is a machine builder and software provider for the digital printing of consumer goods packaging and the personalization of flat financial, identification, gift and loyalty cards.

Our focus on fully automated machines, easily integrated software platforms, and industry-leading user experience, is making us the leading system provider in these market segments. Together with our sister companies Hapa AG in Zurich (Switzerland) and Tritron GmbH in Battenberg (Germany), we form the Coesia Digital Printing Solutions Cluster, which is also active in other markets with the same technical ambition.

We are part of Coesia, a global group of innovative industrial solutions companies headquartered in Bologna, Italy, which encourages and supports our drive for innovation.

Visitor Guidelines

**Atlantic
ZEISER**
a coesia company

Welcome to Atlantic Zeiser!

In the interest of plant safety and an orderly visit process, we ask you to read this Visitor Information carefully:

- Carry your visitor badge to always keep it visible.
- Observe the signage.
- The production area may be entered only accompanied by Atlantic Zeiser employees. Safety shoes must be worn when leaving the designated paths. Showroom excluded.
- The instructions of Atlantic Zeiser employees must be followed.
- Follow the marked paths, pay attention to the passage of forklift trucks and other means of transport.
- Filming and taking photographs are prohibited on the entire company area – except for FAT purposes.
- Customer-specific print samples taken along may not be made available to third parties.

You agree to keep strictly confidential all samples, prototypes, drawings, documents, information and/or knowledge (internal information) provided or made accessible to you by Atlantic Zeiser, and not to make them directly or indirectly available to third parties, either in whole or in part, and to return them upon request.

Atlantic Zeiser reserves all rights to this information (including copyrights and the right to register industrial property rights such as patents, samples, etc.). You also undertake to use the internal information exclusively for the agreed purpose of your visit. This especially applies to technological, procedural and material know-how as well as information on customer relationships, supplier relationships, and order volumes.

Safety 1st

Please keep your distance from all mechanical equipment and installations!

The machines and machine parts in the production area are „under construction“ – not fully protected with the necessary and required safety devices, they present a high risk of injuries and accidents.

Warning: The following types of hazards can occur, for example, in our production and assembly areas:

Danger of UV exposure

Danger of hot surfaces

Danger of electrical shock

Danger of amputation

Danger of emitted rays

Danger of rotating parts

Danger of harmful or irritating substances
